

EXAMPLE REPORT - SYNTHETIC DATA

Monthly availability report

Prepared for Verde (example client)

1 Aug 2026 - 31 Aug 2026 · UTC

Illustrative sample. All organisations, services and measurements are fictional.

Three services in view. One 12-minute checkout incident in this example month.

Portfolio uptime 99.991 %	Total downtime 12 min	Incidents 1
-------------------------------------	---------------------------------	-----------------------

Availability by service

Service	Uptime	Downtime	Incidents
Website	100.000 %	0 min	0
Checkout	99.973 %	12 min	1
API	100.000 %	0 min	0

Example window: 31 days per service, without maintenance exclusions. Portfolio uptime is weighted by monitored time.

Incident review

Example incident: 17 August, 10:08-10:20 UTC. Checkout requests failed after a deployment. The previous release was restored. Website and API stayed available in this fictional scenario.
